

TERMS OF REFERENCE C3 GIS SPECIALIST INTERN

POSITION RESPONSIBILITIES:

Reporting to the International Programme Manager, the C3 GIS Specialist Intern will be responsible for the analysis of field data and production of habitat maps from seagrass survey work in the Comoros. The responsibilities of this position shall be:

1. Analysis of field survey data and production of habitat maps using ARCGIS 9.2
2. Participation in other intern tasks on the C3-Mauritius programme
3. Production of technical reports and scientific papers from data analysis and mapping work

WORKING CONDITIONS

The C3 GIS Specialist Intern will work standard Mauritian office hours at the programme headquarters in Albion, Mauritius, although some assignments will require additional working hours.

QUALIFICATIONS

Required:

- Masters Degree or equivalent experience in an appropriate scientific or developmental field
- Substantial experience of GIS programmes and the application of GIS to biodiversity studies and habitat mapping

Desirable:

- Previous work with international NGOs
- Evidence of writing skills, such as a publication in a peer-reviewed journal

CONTRACT PERIOD

The contract period is for two months, with the possibility of extension.

RENUMERATION

The GIS specialist intern will work under the same conditions as other interns on the C3-Mauritius programme (please see www.c-3.org.uk); however, C3 will partially fund the position, depending on the applicants experience and qualifications.
